

The Best. Always.
Eaton's After Sales Service

Protect Your Employees, Your Systems, and Yourself!

Eaton's After Sales Service can help inspect and check your machines and systems.

Our common goal is to ensure that your state-of-the-art systems and machines will run smoothly so that they can be operated safely, reliably, and efficiently. Of course, this means that all applicable standards and directives need to be complied with, and that a wide variety of factors and physical conditions need to be taken into account as well.

Pursuant to several guidelines and laws, electrical equipment must be checked and inspected on a recurring basis in order to maintain its proper working condition.

According to these standards, electrician must perform checks and inspections at regular intervals.

Failure to inspect electrical equipment properly and in a timely manner can have serious and far-reaching consequences. The costs of bodily injury and property damage, coupled with production downtimes, can quickly add up to millions. And those responsible are bound to face serious criminal and civil charges, as well as consequences in line with insurance law.

We can take care of these important tests and inspections for you.

Eaton's After Sales Service: Making sure your machines and systems run efficiently and safely.

EATON

Powering Business Worldwide

Protect...

... your employees

Your employees' safety and the smooth operation of your electrical equipment are closely intertwined. And since your employees are the most valuable resource in your company, it is only natural that their safety be given topmost priority.

... your machines and systems

Companies operating electrical equipment are legally required to check and maintain it. By scheduling preventive maintenance visits, you will not only be complying with this requirement, but will also be increasing the safety and availability of your machines and systems. This, in turn, will translate into more efficient operation and greater cost-effectiveness for your company.

... and yourself

Employers and/or companies operating electrical equipment can expect serious legal consequences if they fail to meet their legal checking and inspection obligations. Protect yourself by arranging for your machines and systems to be checked and inspected on a regular basis.

Take advantage of Eaton's After Sales Service and maximize your company's safety and cost-effectiveness.

At Eaton, our most important guiding principle is the safety of our employees and the accident-free operation of our machines and systems. Accordingly, we have a well-established zero-incidents culture.

Our common goal: the safe and efficient operation of your electrical equipment
